Officials Set Gorbachev Travel Plans

MOSCOW - The Soviet Union formally announced Wednesday that Mikhail S. Gorbachev, the Communist Party leader, would

> Experts say the new foreign minister is from the same mold as Mikhail Gorbachev. Page 5.

> meet President Ronald Reagan in Geneva on Nov. 19 and 20 and would visit France from Oct. 2 to 5. The official confirmation of the Reagan-Gorbachev summit meeting was made simultaneously in Washington.

Mr. Gorbachev's visit to France will be his first to a Western country since he became Soviet party ader on March 11.

The November meeting, which U.S. officials on Tuesday had said would continue to Nov. 21, will be Mr. Reagan's first meeting with Mr. Gorbachev.

A Soviet Foreign Ministry spokesman said that the talks would cover a wide range of topics and that it could not be excluded that nuclear and space weapons would be discussed.

"All that has been agreed so far is when and where the meeting will take place," the spokesman said. "Other issues will be talked about through diplomatic channels and will be decided in the near future." Mr. Gorbachev was expected to

be accompanied on both the French visit and the summit trip to Geneva by Eduard A. Shevardnadze, 57, who on Tuesday succeeded Andrei A. Gromyko as foreien minister. Mr. Gromyko was named president.

in Washington, a senior U.S. official said that the two leaders planned "genuine substantive exchanges" at the November summit

Limited Expectations

Given the relative brevity of the meeting, U.S. officials said Tuesday that they did not think there would be time to negotiate any breakthroughs, The New York Times reported from Washington.

But they said that the meeting could be used to announce agreements already worked out in such areas as commerce, and cultural and consular exchanges. They added that it might also give some simulus to the deadlocked Geneva nome talks and promote an easing of tensions on regional issues.

The Geneva negotiations cover reductions in strategic and mediun-range nuclear arms and efforts to prevent an arms race in space.

"Our expectations are not great at all," a senior administration official said. "Its main purpose will be 10 engage the new Soviet leadership and for each side to have a better understanding of the other."

U.S. officials said that they expected Secretary of State George P. Smitz and Mr. Shevardnadze to meet in Helsinki on July 31 and Ang. I while they are there for celebrations marking the 10th ansiversary of the signing by 35 na-tions of the document on cooperadon and security in Europe.

TOMORROW

Emirates Lead in Personal Income

The Associated Press WASHINGTON - The United Arab Emirates, Kuwait and Switzerland led the world in personal income in 1983, according to figures released Wednes-

day by the World Bank. The report placed the figure for the United Arab Emirates at \$22,870 a person. The emirates, a group of seven independent states on the Gulf with a total population of 1.18 million, obtains its wealth from oil. Kuwait, an oil-producing neighbor of the emirates, with a population of about 1.5 million, had income of

\$17,880 a person, the report said. In both Kuwait and the emirates, much of the average person's income is in the form of free housing.

education and health services, the report said.
Switzerland's average was \$16,290, followed by the
United States with \$14,110 and Norway with \$14,020. Switzerland, the Nordic countries and the United States were among the bank's 19 high-income "industrial market economies." That list included Spain,

Others countries with average incomes more than \$10,000 were: Sweden, \$12,470; Canada, \$12,310; Same Department of finish and the second state of five months ahead of time, a senior Denmark, \$11,570; Australia, \$11,490; West Germany, \$11,430; Finland, \$10,740; France \$10,500; and the state of ficial said, the

Japan, \$10,120.

Saudi Arabia, which was not included in the industrial group. had an average income of \$12,230, the

The lowest income is in Ethiopia, \$120 a year, a bit less than Bangladesh with \$130. The report offered no figures for 21 countries,

including the Soviet Union and most others with Communist governments. It calculated the income in China at \$300 a year, and said it had risen at an annual rate of 4.4 percent from 1965 to 1983. Others of the 29 countries in the lowest-

income group had annual growth rates equal to or below 2.5 percent, which is Pakistan rate of growth. There were 30 nations in a group the bank called "lower-middle-income countries." They ranged from Colombia, with \$1,430, to Senegal, with \$440. Five countries showed long-term declines in average income: Senegal Zambia, Egypt, Nicaragua and

The most prosperous of the 19 "upper-middle-income" nations was Trinidad and Tobago, with \$6.850 a year; the lowest income in this group was in Jordan, with \$1,640. Only one nation, Chile, was reported to have had a long-term decline.

Iran and Iraq were also included in this category, although the World Bank said that it does not try to estimate their income.

The report also noted that there were six African countries in which the average incomes showed declines in recent years. They were Zaire, Uganda, Niger, Somalia, Ghana and Madagascar.

Sue Ellen Deutsch Herzberg and her husband, Richard, who was held hostage, happily board airliner in West Germany for flight home after hijacking interruption.

The people who took us off the plane are vile, disgusting animals . . . and they should be treated as animals. They should be brought to justice somehow.

to adopt their views.

me, no matter how hard they tried, and I let them know it," he said. Jimmy Dell Palmer Sr., who was freed a few days earlier than the other hostages because of a heart ailment, criticized Mr. Conwell's performance as spokesman.

While he had agreed, he said with the group's spokesman most of the time, "Towards the last I was beginning to get the feeling that he was slipping a little bit too much toward their side,"

■ Crew Describes Ordeal

The three-member flight crew held hostage aboard a TWA plane for 17 days described at a news conference Wednesday how the hiackers brutally beat two navy divers, one of whom they eventually killed, apparently over frustration in getting their demands across, The Associated Press reported from New York.

John L. Testrake, captain of Flight 847, said the hijackers brought two men up to a section right behind the cocknit.

They beat on them quite severely," he said, apparently referring to Robert Dean Stethern and Clinton Suggs, both Navy divers

They wrenched one of the arms off the flight engineer chair and used that as a club to beat these young men." Mr. Testrake said.

They would jump on them with all of their weight, on their bodies. They jumped on their bodies repeatedly and did this on and off."

Japan Ready to Start Sending Military Technology to U.S.

By Clyde Haberman New York Times Service

TOKYO — After more than a year and a half of inaction, the United States and Japan have set in motion a 1983 accord under which Japan agreed to provide its main ally with advanced military technology.

U.S. officials, for the first time, have singled out a piece of Japanese high-tech gadgetry that they want: an "image-seeking" device to help guide missiles to their targets.

room to U.S. who had been made at all. "The real purposes. In deciding to make an information," a Japanese military exception for the United States.

"In a way, it's a test case to get the basic system set up," the official said, adding: "Eventually, most of the significant military. importance," a Japanese military expert said, "is that it finally opens cans hope will be a steady flow of Japanese technological skill in their tween the two countries.

Castro Edges to the Forefront in Pressing, for Solution to Latin Debt Crisis U.S. Copter Williams

Fidel Castro: Seeking a regional leadership role.

By Edward Cody Washington Past Service

HAVANA - In fresh uniforms and school bandanas. Cuban children lined up at the airport to greet a visiting

dignitary with songs and folk dances. The debt of Latin America and the Third World must be canceled," they chanted, directed by an earnest-looking

The sight of children cheerleading for international financial reform might have seemed incongruous elsewhere, but in Cuba it was just another sign of President Fidel Castro's intensive campaign to become a leader in a search for solutions to Latin America's foreign debt crisis.

In interviews, speeches and actions by his government, the Cuban leader has made the \$360-billion Latin American debt burden his top concern.

Much of that debt is owed by Argentina, Brazil and Mexico, and not by Cuba. But Mr. Castro has advoitly involved himself in the issue, causing potential foreign policy challenges for the United States.

He had repeatedly underlined the gravity of the crisis, calling the debts and interest impossible to pay. As solutions. he has suggested a sort of debtors' cartel and urged the U.S. government to assume the debts so U.S. banks could release vernments from the obligations.

Mr. Castro, who for years has been regarded as the symbol of revolution, accompanied his concern with warnings that failure to relieve the debt burden soon could lead to social upheaval across the continent.

Rather than rejoicing in this prospect, he has stressed a need to avoid it, and has assumed the role of statesman he wants to preserve Latin American institutions, including links to the U.S. banks holding most of the debt.

countries' independence. This situation has brought Third World countries to such a state of dependence, exploitation, extortion and abuse that independence and struggle for the new international economic order have become the main issues for Latin American and other underdeveloped countries. Social changes alone are not the solution."

According to diplomats here, the roles of elder statesman and political sage have grown increasingly attractive for President Castro.

The Cuban leader, whose beard is turning gray as he approaches 59, relishes his place among Latin America's most durable and experienced leaders. Expressions of concern about Latin debts also fit in with

the his increasingly successful effort to end his long isolation from other Latin American governments. Several formerly hostile governments have warmed to the Cuban. For these governments, Cuban chants about the debt crisis have been sweet music for rapprochement. They have

much as did Cuba's position during the 1982 war over the schedules Falkland Islands, or Malvinas.

Cuba's Despite opposition to the junta then roling Argentina, Cuba was careful to support Buenos Aires against the British

"Fidel has struck another chord that began with the Malvinas," the diplomat said. "And that chord is that we are Latin Americans and we are countries in our own right, and we shouldn't let the United States push us around." The United States supported Britain in the conflict.

The possible violations included

"Right now, there is something more important than social change," Mr. Castro said in March in an interview when many Latin American leaders fear that the Reagan administration's emphasis on Central American confrontations has distracted Washington from what these leaders see

as the more important issue of economic crisis. Talk of the debt crisis also gives the Castro government an opening to plng its relations with the Soviet Union as an alternative to most Latin countries' ties to the United States and U.S. banks.

U.S. officials have estimated that the Soviet Union provides Cuba with \$4 billion a year in subsidized trade and cash. In a recent five-year economic cooperation accord, The Soviet Union suspended repayment of a Cuban debt owed to it and Eastern Europe, estimated to total \$9 billion.

"We have been able to postpone payment of our debt for 10, 15 and even 20 years without interest," Mr. Castro boasted in the Excelsior interview. Cuba also has trade relations with the West, although they

constitute only about 13 percent of the total. And despite his proclamations that Latin America's foreign debt is beyond payment, President Castro's government has renegotiated its own \$3-billion debt to West European governments and contributed to a sense of Latin solidarity, a diplomat said, banks with promises to pay faithfully according to the new

Cuba's \$3-billion debt, however, has little in common with Brazil's \$98 billion, Mexico's \$96 billion or Argentina's \$48

In this light, Mr. Castro has suggested that Cuba would remain outside any Latin debtors' club, if such a group were formed as he has advocated. With or without Cuba, diplomats said, such a cartel would likely become a thorn in the side of the U.S. government, since U.S. banks hold most of

U.S. Seeks to Deport Ex-Rebel Chief Critical of Reagan Nicaragua Policy

By Kendall J. Wills
New York Times Service

NEW YORK -The U.S. Immigration and Naturalization Service has started proceedings that could lead to the deportation of a former Nicaraguan rebel leader who has been critical of Reagan administration policies, according to an immigration official.

The official, Perry A. Rivkind, the immigration service district di-rector in Miami, said Tuesday that he had reviewed the file of Edgar Chamorro after reading an article written by Mr. Chamorro last week that was critical of U.S. activities in Nicaragua. Mr. Chamorro is a former director of the Nicaraguan Mr. Chamorro said in a telephone Democratic Force, the major guer-rilla group fighting the Sandinist government and known in Nicara-

At the root of the crisis has been a split between the Socialists and their junior partners in the governing coalition, the more conservative Social Democrats, over plans by Mr. Sources to run for president in elections scheduled for December.

Under the Portuguese system, the prime minister runs the government, but the president molds a long-term vision for the nation through select powers such as calling elections.

Nearly a month ago the Social Democrats announced they were pulling out, but not until after the signing of the EC treaty in early

Then, Mr. Soares dramatically declared his intention to resign, but he did not submit his resignation

But adding to the popular letharannouncement that had been gy at the moment is that the beach scheduled, canceled and then isweather is balmy — political lead-ers could not be found over the a statement read by an aide over weekend — and that the govern-national television that he was disment's fall is unfolding in slow-motion half steps and whole confu-but not until after it ratifies the EC treaty.

The ratification, which enjoys overwhelming support, is scheduled to be voted on July 10. But a snag in the timing could throw all plans awry. The president's constitutional power to dissolve the as-sembly runs out July 14, six months before the end of his term. That gives him four days after the sched-

President Eanes also refused to accept Mr. Scares's resignation. The president said he would consider it "at an appropriate time," which his aides said meant that he wanted Mr. Soares to stay on until the assembly elections, probably in early October.

uled vote.

Mr. Soares had wanted to disso-ciate himself from the lame-duck government and focus on his presidential campaign, though in office he at least has control over porkbarreling and the state-run televi-

allies seeking to avoid assembly elections. Mr. Eanes argued that elections would be destabilizing as and there is no relief in sight. The living standards have been dropping, the government is in the
midst of a tough but needed austerity program, and Portugal lags in

Polish Leader Shevardnadze: Cut From Boss's Mold Of Strike Gets Experts Feel He and Gorbachev Will Form a Close Team

WASHINGTON - U.S. anatysts of Soviet affairs believe that Mikhail A. Gorbachev has picked a new foreign minister cut from his own mold, a man of political ability and wit who will allow Mr. Gorbachev to shape his own foreign policy over the long term.

To several U.S. specialists, Eduard A. Shevardnadze, 57, the new foreign minister, may lack experience, but he has, they said, shown himself to be "imaginative," "breezy" and forceful.

Dimitri K. Simes, a specialist at the Carnegie Endowment for Inter-national Peace here, predicted that Mr. Shevardnadze would first change the conduct and style of Soviet foreign policy and then, with

nion for protests.

Jerry Hough, at the Brookings
The government has denied that Institution in Washington, said: "If any strikes occurred despite Soli-darity claims that there were stop-pages in factories in Warsaw, the policy, that's how you do it. It's very much a break with the old."

Gorbachev on the Move

Mikhail Gorbachev is transforming the Soviet government, trying to get his country moving again by drawing compatible and younger men to the top. That much is plain from his first 100 days as Soviet Communist Party chief. President Reagan is right to move toward a meeting with him next fall, to form his own first impressions.

Mr. Gorbachev is the fourth Soviet leader in the four and a half years of Mr. Reagan's presidency, but obviously the first with the energy and life expectancy to pull the economy out of stagnation. With impressive speed he has now retired his principal rival, Grigori Romanov, and moved Andrei Gromyko upstairs to the ceremonial presidency. The choice of Eduard Shevardnadze, a Georgian reformer, instead of a diplomat as foreign minister seems to underscore the Gorbachev theme that all must flow from domestic development.

Mr. Gorbachev, 54, preaches discipline and reform and is busily promoting reformers, but from a party hierarchy that has always put political control ahead of efficiency. Little is known about the new men. How far they mean to take decentralization, and how sincerely they let market principles shape their decisionmaking, will not be evident for years.

Mr. Gorbachev has hinted that economic development will get higher priority than his military budget. He has shown particular in-terest in easing tensions with China that claim a large part of that budget. No comparably large savings are likely from better relations with the West, but a moderation of the arms race could benefit the economy and improve Soviet prospects for more trade and access to Western management and technology. These are reasons enough for Mr. Reagan and Mr. Gorbachev to get to know each other. They have a chance to lighten their burdens not only in military spending but also in Afghanistan and Central America. If Mr. Gorbachev means to devote himself to the home front, there is business to be done with America.

- THE NEW YORK TIMES.

Israel at War With Israel

Israel has often enough proved that it can mobilize against formidable military threats. Now it will learn whether it can mobilize to meet the subtler yet potentially deadly internal threat. The austerity plan just announced by its cabinet is not likely to leave people hungry. but the plan must sharply cut living standards if it is to make a difference. Ideally it must also jolt into flexibility an economic system long

enfeebled by state intervention. Israel's permanent problem is how to stretch a little a long way. It is a tiny country, poorly endowed with resources and unable to create integrated markets with its neighbors. Yet it must spend 20 percent of its income on de-fense, 5 percent to service foreign debts and perhaps another 5 percent to support the un-hindered immigration of Jews. And it must manage these burdens so well that it remains attractive to a productive elite that could easily

move to Los Angeles or Toronto. The less obvious but no more tractable problem is how to bend a welfare state to the needs of a modern economy. The government employs 30 percent of the work force, shoring up the inefficiency of state enterprises with subsidies and legal protection against competi-tors. Private industry is swaddled in enough regulation to make a Bulgarian bureaucrat blush. And anyone who seeks reform must take on a highly politicized labor movement. Israel used to muddle through on a combi-

nation of nationalism, hard work and U.S. aid. But in recent years competition between the two main political coalitions has made it impossible for either to say no to special interests. Now the chickens are coming home to roost.

Since 1977 the government's budget deficits have averaged 15 percent of GNP, three times the rate in America this year. Wages have been negotiated to levels that exceed productivity, and have been indexed against price increases. With too much buying power chasing too few goods, inflation runs at 400 percent. Israel's reserves of foreign currency, its overused rainy-day fund, have sunk to just \$2 billion.
To qualify for badly needed extra American

aid, the coalition led by Shimon Peres has once before tried and failed to implement programs that would force Israelis to live closer to their means. The newest plan, enacted by emergency decree without resort to the Knesset, reduces food subsidies, freezes wages, de-indexes savings, devalues the currency and trims back government employment. The idea is to reduce consumption by about 10 percent, freeing output for export and investment.

Prime Minister Peres's plan is temporarily shielded from the Likud opposition in his coalition. Likud has no alternative and no wish to be blamed for more failure. Success in the short run thus turns on the government's determination to hold the line.

But in the longer run, even more than belttightening will be needed. Nonmilitary spending must be reduced enough to permit tax cuts. Inefficient public enterprises must be priva-tized. Most important, the protections and subsidies that make the government a partner in every private company must be untangled. Is Israel ready for a heavy dose of free market capitalism? If not, no conceivable help from its friends is likely to save it from stagnation. - THE NEW YORK TIMES.

Learning Their Language

A generation ago, few American school districts gave much attention to educating children with limited or no knowledge of English. Initial and interpreting the Delphic protocol to the courts, favored this form of bilingual education. Not surprisingly, a pothe Southwest) with many non-English speakers, the procedure all too often was to conduct classes in English and let children whose primary language was Spanish sink or swim. By the early 1970s it was widely recognized that this was neither fair nor effective. Moreover, the sudden and almost entirely unanticipated rise in immigration, mostly from Latin America. East Asia and the eastern Mediterranean, meant that for the first time in half a century a substantial number of pupils would enter America's public schools without knowing English. How are they to be educated?

The federal government more than a decade ago began funding what it called bilingual education — teaching the child in his original language while also, at least theoretically, teaching him English. The Carter Department of Education, in administering federal bi-

There had been no substantial immigration tent lobby, including foreign-language teachfrom foreign-language nations since the 1920s, ers, grew up to support it. Many school dissome because they could not find teachers proficient in Lao or Hmong, others because they believed that children were being held back from learning English as quickly as they could; but they found it difficult to do so.

The Reagan administration's Department of Education has played a more constructive role by not insisting on one rigid approach and by giving school districts more leeway. Federal policy used to be premised on the often correct assumption that local authorities could not be trusted to do the right thing and had to be closely regulated. But on this issue, as on other education matters, local authorities, prodded by parents and voters, have been making sensible changes. Washington does well to encourage such experimentation in the important

work of helping children learn English. - THE WASHINGTON POST.

Other Opinion

A Cause Criminally Served

President Reagan's promise to "fight back" against {the Shiite hijackers} has a hollow ring. A more meaningful option than revenge would be for the administration to make a sustained effort to bring about better international cooperation on airport and travel security, while at the same time addressing the frustrated

hopes and the pains of those who turn to terror as a weapon to address perceived injustices. - The Oregonian (Portland).

The hijackers conducted themselves not as political activists but as common criminals committing uncommon crimes against innocent victims. They must be treated as such. - The Chicago Sun-Times.

FROM OUR JULY 4 PAGES, 75 AND 50 YEARS AGO

1910: Hopes for a Safer 4th of July NEW YORK — The observance of the Fourth of July will be marked by the first serious and practical attempt to celebrate independence Day with some reduction of the slaughter that action by the powers for the security of all is has long seemed an unavoidable accompaniment of the annual patriotic thrill. New York City, on the invitation of Mayor Gaynor, is leading the way toward a realization of the long-cherished dream of a safe and sane Fourth. The Mayor, having ordered that no cy of the collective system. If the League is fireworks be permitted on open sale, urged the unable to assert its authority by settling the organization of an old-Jashioned Fourth, mi-dispute between Italy and Ethiopia in a pacific nus promiscuous explosions, ambulance calls, fire alarms and mothers in tears over blackened and fragmentary patriots in knickerbockers. Funds have been raised for firework displays in certain public places, so that youth preparation for military conquest of Abyssinia may not be deprived of any of its inherited rights and may yet preserve its anatomy.

1935: Abyssinia Tests the League

LONDON - The basing of British foreign policy on the principle of collective security will be abandoned if it is found that collective impossible of realization, it was stated in wellinformed circles here [on July 3], following a Cabinet meeting almost wholly devoted to the Abyssinian question. The British government regards Abyssinia as the test case of the efficabroken down. The continued sending of Italian troops to East Africa and the apparent are taken as evidence that Italy has no intention to abide by the Covenant of the League.

U.S. Television Was Hijacked to Beirut

WASHINGTON — The bizarre siege is over and a certain amount of matual congratulation is going on. Except for young Robert Dean Stethem, the enlisted navy diver who lies in Arlington Cemetery in a martyr's grave, the hijack victims have been freed to go home. The last of the burbling interviews, even those with the families hired by the

networks, will be coming to an end.

There has been nothing like it in the history of terrorism. Amal Shiites, for two unbelievable weeks, came close to making terrorism folksy. Once the initial horror of Mr. Stethem's murder had passed, the whole episode em's murder had passed, the whole episode took on the surreal coloration of some kind of exchange program, a seminar in U.S.-Mideast relations, conducted under the gun. Apparently, after long bull sessions on religion and politics, each side came away with a new appreciation of the other's point of view.

What did the rest of us learn? Americans

discovered again the awesome power of tele-vision. Amal had figured out that television sanctifies people for Americans. By appear-

sanctifies people for Americans. By appearing on the screen over lunch at a seaside restaurant in Beirut, attending a last supper with their captives and being kissed goodbye, the terrorists restricted Mr. Reagan's options. At the outset Mr. Reagan was being importuned to take the hard line by other television luminaries such as Henry Kissinger and George Will; to put "national interest" over the mere saving of lives. The battle, if there ever was one, was finished one the first mad news conference flashed on the box. The Amai Shiites had turned the hostages into

television celebrities, and Americans take television celebrities seriously.

Hostage spokesman Allyn B. Conwell was made for television. He has light eyes and regular features and looks something like J.R. Ewing, Mr. Couwell could have been the hero of a daytime soap: earnest, troubled, articulate — and with narrow interests of his own. He made statements that caused a certain flinching at the highest levels in Washington

By Mary McGrory

and prompted expert comment about the "Stockholm syndrome," a phenomenon in which hostages are said to come to identify with their captors rather than with the people who are trying to free them. But you don't have to be a hostage to urge the israelis to release 700 Lebanese prisoners, most of them Shiites. Indeed, it was official U.S. policy that

those prisoners were being held illegally.

When Mr. Reagan and Secretary of State George Shultz belatedly tried to include the seven "forgotten hostages" in the deal they vigorously denied they were making, Mr. Conwell protested. He was perhaps reflecting self-interest rather than the Stockholm synthesis and the Stockholm synthesis an drome. As Mr. Conwell doubtless saw things,

Nabih Berri, the Amal leader, had at best a tenuous hold on the Shiites that the hostages could see, and none on those out of sight. Mr. Reagan acquired a new best friend in the Middle East in the person of Syria's President Hafez al-Assad, a rather sinister figure he used to think of as an agent of terrorism and a Soviet pupper. Mr. Reagan had to give up on the seven forgotten victims. He had to back down on "no deal." He made no visible progress against international terrorism. But he will call it a victory, stoutly averring that Israel's release of more Shiite detainees is sheer coincidence. If he says it often enough

on television, he will be believed. The made-for-television hostage crisis has shown us that the box is the real source of truth and power in the world.

Washington Post Writers Group

But the Alternative to Popular Media Is Worse

W ASHINGTON — When bearded, cold-eyed hostage-takers assemble their vic-tims at the point of a gun and whistle up the television cameras to make their case, the "media" turn into a stage for terrorism and

Henry Kissinger turns apoplectic.
"It is a humiliation for the United States to have American citizens trotted out one by one, being forced to say they're being treated well." Mr. Kissinger said (on television). "I think what the media ought to consider is not to carry anything, including the terrorists."

Not carry anything? Not even Henry Kissinger hustling from one network studio to another, logging at least equal time with Nabih Berri, exploiting the same stage to inflame public mession in support of a course of action

no concessions, no negotiations and retalia-

public passion in support of a course of action sharply at odds with the policy that the government in power is struggling to pursue?

Along the way, Mr. Kissinger demanded

I FEEL

By Philip Geyelin

tion when this is over." He insisted that the Reagan administration "make it absolutely clear that any damage to any American will lead to very violent reprisals Manipulation of the media, then, has ev-

erything to do with the quality of the message and with who is sending it: uncivilized barbarians, accomplices to hostage-taking, or the elite of the American establishment.

It will not surprise you that this message-carrying member of the media thinks that proposition stands the problem on its head. In an age when camera angles, photo opporman age when camera angres, photo oppor-tunities and the easy command of network prime time have become a political art form — with the media as willing collaborators — manipulation of the media is not the issue.

The solution to what is, indeed, a real problem turns on actual consequences, established values in an open society, practical alternatives. We are talking about a fiercely competitive free enterprise. The alternative is a news business subsidized and controlled by government. So, yes, a freewheeling press gets in the way of orderly foreign policy-making. But if we can stipulate that government censorship of the end product is not the answer, serious concern has to center on sensible restraints at the source — imposed by government discipline and discretion, or self-inspected by the source parts and discretion, or self-inspected by the source parts and discretion.

imposed by the news business itself. It comes down in the end not to dogma but to cases.

Reckless speculation about troop deployments, it is generally agreed, endangers lives.

Reports of the dispatch of the U.S. Delta force to Cyprus broke the rules. Yet it has to be noted that for every such general there is be noted that for every such report there is usually a government source. The administra-tion that could invade Grenada without public notice ought to be able to move its most sophisticated strike force in similar silence. Much less is to be said for the Kissinger

case: that the hostages and their captors should be unseen and unheard by American audiences. The hostages said they were being well treated, were opposed to any rescue effort and (avored a swap for Israel's Shite prisoners. That this did not fit the Kissinger theory of the case does not mean it was not so, and still less that they were "forced" to say it. As to their treatment, we had the evidence of

their appearance, not to mention the indepen-dent judgment of the Red Cross.

As to the rest, you could argue that the hostages were better positioned than anybody to judge the chances of a rescue effort, if only because they knew more than anybody else about the conditions under which they were being held - the level of security, the locations. Their sense of how to strike a deal for their release was not all that different from the administration's sense, from the start.

The argument is heard that Nabih Berri should not be given access, over the head of the U.S. government, to the American public, But if he is part of the problem, and potentially a part of the solution, surely American television viewers are sturdy enough to be trusted to take their measure of all the players. If not, who is to pick and choose?

That is really the nub of it: the confidence

you have, or don't have, as the case may be, in the good sense of the American people. If the news coverage has been obsessive and over-whelming, that is in the nature of the beast. If, as a consequence, it plays into the hands of terrorists, the American people are smart enough to take that into account.

In any case they are at least as likely to be swayed by so prestigious a figure as Henry Kissinger as they are by a bearded gunman in Beirut. Not being dummies, they may even have a better sense than the media critics and the public relations junkies in the thick of policy-making about what they are seeing— and about when they have seen enough.

Third World Development: The Nightmare Is Probably Over

By Jonathan Power

LONDON — In its "World Development Report" published this week, the World Bank observes that the economic turbulence of the past lending and undisciplined spending few years has subsided. With an enormous budget deficit in the United States, slow growth in Europe and drought in Africa, it is all too easy to the 1970s, using the Eurodollars defeel that we are still in a sinking boat. We are not. The worst is probably over and there are good reasons to

start thinking more positively again. The debt crisis took an awful toll. Dozens of Third World countries have lost a decade or more of development. But the damage is not irreparable, and there is no ground for concluding that bank lending is necessarily a bad thing or that the future cannot be bright. Even with all the setbacks, the economic record from 1960 to 1980 has no precedent.

Never in the history of mankind have so many people had their carcumstances improved so dramatically. The GDP growth of the Third World countries averaged 6 percent a year; average life expectancy rose from 42 to 59 years; infant mortality was halved and primary school en-rollment rose from 50 to 94 percent. True, these are rough figures, and any average for 3 billion people conceals extremes. But this has been a remark-Piecemeal, the debt crisis is being

able period of human change.

 $B^{\, \text{OSTON} \, - \, \text{Americans might}}$ have chosen some other day.

sorted out: lessons of profligate over-

posited by the oil states, is not un-precedented. Between 1870 and 1913, Britain invested an average of 5 percent of its GNP abroad, and recipi-ents like Canada, Australia and Argentina were taking in foreign capital in such quantities that it made up about half of all domestic investment. At the most, during the 1970s, foreign capital inflow to the developing countries amounted to 20 percent of their gross investment. Debt crises in the past, too, have

had worse calamities. There was no major default this time, unlike the Peruvian and Turkish crises in the 1970s and the Argentine and Brazilian crises of the 1880s and 1890s. Even the debt rescheduling that has gone on does not seem so serious, when one recalls that between 1955 and 1970 Argentina, Brazil, Chile, Ghana, Indonesia, Peru and Turkey were forced to reschedule a total of 17 times. The numbers in trouble are greater now—there were 31 reschedulings last year — but it is not as

conference should seek agreement on a comprehensive analysis of the crisis and specific solutions.

Debtors and creditors alike share responsibility for the current situation. What is at stake in most developing countries is not only debt but development itself. A painful but unidevelopment user. A paintu out in-lateral adjustment process would be neither fair nor appropriate. Totally unacceptable demands which under-nine the dignity and well being of the people, or demands which imperil the

afforts to enhance democratic forms of government, must be rejected.

The conference should seek agreement on rescheduling specific debt obligations, lengthening the time pe-riods for repayment, lowering and imposing a ceiling on interest rates and limiting debt servicing payments to a legal tied to export servicing. to a level tied to export earnings.

— From a statement this week by the Socialist International.

countries is not to get financially overextended as they did in the late 1970s, and to help persuade the financial banking system to become more sophisticated and flexible. The developing countries need to be able to borrow heavily with longer periods of maturity. This means increasing the resources of the World Bank and the regional development banks.

It means making sure, with future commercial loans, that borrowers do not have to assume all the risks of adverse developments in the world economy. More instruments for hedging risks need to be brought into play. Likewise, risks could be spread further by introduction of more direct and portfolio investment. For the African countries in particular, there is going to be a greater need for more aid, but aid better coordinated and more tightly focused.

It is not pie-in-the-sky thinking to be optimistic about growth. It is pos-sible to conceive of the industrialized economies growing at more than 4 percent a year, of trade barriers falling, capital flows expanding and the Third World countries growing once

more at around 6 percent a year. Even in the most optimistic scenario, though, no one sees much hope for Africa. The prognosis is continuing decline, although hopefully not at the sharp pace of the last 10 years.

Africa apart, one can imagine in the lifetime of most of us a Third World that far outpaces the growth rates of the industrial revolution experienced in Europe and North America. Despite the severe stress and strains of population growth and communal and ethnic tensions, the developing world (with the exception of Africa) is far ahead of the West at a comparable stage of economic development. There are some advantages in starting late.

As the nightmare of the early 1980s recedes, the last thing most of the Third World needs is pity. What it does need is capital and technology. International Herald Tribune.

S ANTIAGO — Water workers
in northern Chile have discovered a collection of human mummies 3,000 years older than the first mummy of an Egyptian pharaoh, and scientists are now revising their theories on South America's earliest societies

> Excavations for a new water pipe in the city of Arica led archaeoloeists to one of their richest finds — % mummies preserved in the hot desert sands for periods ranging from 3,670 to 7,810 years. Recent carbon dating tests have confirmed the mummies' antiquity.

> "This discovery will change our view of primitive societies," said Dr. Marvin Allison, 64, an American pathologist who works at Arica's University of Tarapaca.

eties were much more complicated than originally thought," he said. "They must have had a good social structure. Don't forget they maintained themselves twice as long as

His laboratory dissections have shown that the techniques used to preserve the bodies were far more complicated than the embalming practiced on ancient Egyptians.

The degree of social organization required for such burial rites has led Chilean scientists to rethink "I think it shows that these sociideas about the Indians who settled on the Pacific coast of South Amer-"We have always thought that

man built his first villages in the years 500 to 1,000 B. C., and now we find a high degree of settlement long before," said Hans Niemyer, director of Chile's Natural History Museum, who also found mummies in the area, six years ago.

By Walter Sullivan

New York Times Service T SING artificial earth tremors, Cornell University scientists have found what they believe is the geologic connection where Florida and southern Georgia joined North America 250 million years ago.

In the final stages of Africa's collision with North America, according to the widely accepted theory of plate tectonics, a part of Africa now forming Florida and southern Georgia was squeezed against North America. When, 50 million years later, the continents broke apart and the modern Atlantic Ocean began forming those regions remained as part of North

America.
This sequence of events had been indicated in recent years by rock samples more than 350 million years old that were extracted from deep holes drilled through sediments of the Suwannee Basin of northern Florida and southern Georgia. The samples contained fossils of African, rather than American, affinity, Magnetism im-printed in the rock also showed that it then

ay in the same magnetic latitude as Africa. The new evidence, however, appears to have identified the zone where the two land masses became welded together. According to the Cornell scientists, it is the first time such a deeply buried "suture" has been located precisely.

The evidence was obtained from lines of seismic soundings that ran from Dunellon, Florida, north to Grantville, Georgia. A complex of deep-lying seismic reflectors recorded in the zone between Buller, Georgia, and De Soto, Florida, 40 miles (65 kilometers) to the south is halfaned as mark the suture, or zone of collision.

Butler is close to the "fall line" where the loftier Piedmont drops to the coastal plain. Many East Coast cities evolved along the fall line, including Philadelphia, Baltimore, Richmond, Virginia, and Angusta and Ma-con, Georgia, because that was where water power was available or because the line was the upstream limit of ocean shipping.

The Cornell scientists believe, however, that instead of following the fall line, the suture follows an east-west zone of weak terrestrial magnetism, known as the Brunswich Magnetic Anomaly, which runs out into the Atlantic Ocean across the contineutal shelf east of Georgia.

The suture is then thought to turn north along a zone of weak magnetism that parallels the outer edge of the continental shelf. A similar magnetic zone has been mapped along the African coast from Dakar north. If Africa could be moved back to the position it is believed to have occupied when welded to North America, before birth of the Atlantic, these two magnetic zones

This, it is thought, not only was the suture between the two continents, but marks where they split apart. An excep-tion, however, is that portion of the suture where Florida and southern Georgia remained joined to North America.

Profiling of the deep structures under Florida and Georgia was carried out by Douglas Nelson and his colleagues at Cornell as a project of the Consortium for Continental Reflection Profiling It has been financed largely by the National Science Foundation.

The project uses a technique, originally developed for oil prospecting, in which

vibrator trucks shake the ground at various frequencies. By recording the reflections of these vibrations from underground structures, formations can be identified at depths as great as 30 miles.

When Continents Collide: Scientists Find 'Suture' in Florida

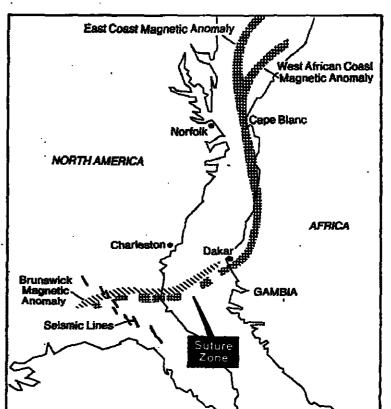

Profiles obtained in this manner have already revealed deeply buried and hitherto unsuspected features of the continent Among the discoveries has been that extensive sections of the landscape were thrust across what were once features near the

According to Jack Oliver, director of the project at Cornell, the suture zone appears to be triangular in cross section, with a relatively narrow top at a depth of three miles and a broad base where it reaches the base of the crust, or "Moho," 20 miles below the surface,

Below the Moho - a nickname for Mohorovicic discontinuity - the rock becomes substantially denser and therefore transmits earthquake waves at higher velocity. A striking feature, Mr. Oliver said in a telephone interview, is failure of the su-ture structures to penetrate below the Moho. This had been seen in other surveys, but never so clearly, he added.

It is assumed that the continental blocks that merged extended far deeper into the Earth. The fact that evidence of the sumre does not extend below that level implies, Mr. Oliver said, that the Moho somehow "reconfigured itself."

A puzzling find, at a depth of nine miles, was a seismic "bright spot" of the type often associated with oil and gas deposits. Mr. Oliver is uncertain whether it repre-

The areas of "magnetic anomaly" have helped scientists map where sents fossil fuels, malten rock or some Africa and North America were once connected at the suture zone.

The pattern of incoming signals, conductance but perhaps a variety of other whether prosopagnosics might in fact be recognizing familiar faces at a subconscious maplike way with the features of the face, is Subconscious activities in the brain are matched against "templates" representing Using instruments similar to a lie detector, familiar faces in the memory. If a match is blood pressure, digestion, and a host of other Dr. Damasio tried to detect emotional refound, associated memories, such as the bodily processes that play roles in psychosocould not say which was which.

Dr. Damasio tried to detect emotional refound, associated memories, such as the bodily provides say they have learned to recognize sponses that altered the body in subtle ways face's name and history, are retrieved from matic dis

people important in their life from other without producing a conscious reaction. He storage and the whole set of associated mem-

one of life's most common experiences—
Those with the disorder have normal vision and reading ability and have no trouble
for the brain to react to people and places by triggering psychosomatic reactions, from sweaty palms to perhaps even ulcers, with no conscious perception.

The research also shows that it is possible describing facial features or pointing out describing facial features or pointing out definite change in skin conductance.

When the electrodes picked up a definite change in skin conductance.

When the faces were of people that Dr. Damasio said he found that, even sometimes within the brain. Nobody knows exactly what parts of the brain though experimental subjects could not recbeen familiar, the electrodes picked up a definite change in skin conductance.

When the faces were of people that Dr. Damasio said he believes they must be cause prosopagnosics have a skin response.

When the faces were of people that Dr. Damasio said he believes they must be cause prosopagnosics have a skin response, they can even tell be for the brain though experimental subjects could not recbeen familiar, the electrodes picked up a definite change in skin conductance.

When the faces were of people that Dr. Damasio said he believes they bear though experimental subjects could not recbe though experimental subjects could not recbe though experimental subjects could not recbe the known structions returns than known structions returns the known structions is the countries of the brain Nobe the faces were of people that Dr. Damasio said he believes they have parts of the processes. But because prosopagnosics have a skin response.

The new evidence countries within the brain Nobe the familiar, the electrodes picked up a definite change in skin conductance.

When the faces were of people that Dr. Damasio said he believes they be a skin response.

The new evidence countries within the brain Nobe the familiar than known structions of the brain than known structions of the brain Nobe the familiar than kn mally reach the conscious brain.

If Dr. Damasio's scenario of brain events process of recognizing a face, but were to other forms of memory. If so, he suggests, blocked at a key stage in the sequence of subtle forms of brain damage, too small to brain events. The first step in this series is that nerve ing people of conscious reactions to the world around them but still permitting side effects of those reactions to after not just skin

known to alter heart and breathing rates,

ADMINISTRATIVE DIRECTOR

Hygeis hospital in Athens, Greece intends to hire an administra-tive director. The ideal candidate should have sound background and experience for such a position and very good knowledge of the English language. He should not be more than 45 years old. The main duties of this position are management, control and coordination of the ancillary departments in order to achieve the set target. The center offers very good working conditions. Salary will be determined according to the qualifications, experience and personality of the candidate.

Applicants are requested to send their C.V. to: Personnel Director, Hygeia Hospital Kiffissias Avenue and Erythrou Stavrou 4, Athens 15125, Greece.

Treated Alcoholics Found Unable to Drink Moderately

POSTON - Fewer than 2 per-B cent of people treated for alco-housin are able to drink socially, and most of those who conquer their condition give up drinking completely, according to a published study

We would have to urge alcoholics that the only feasible cure for their problem at this point is total abstinence," said Dr. John E. Heizer, who directed the study. That would seem to be the case for

the vast majority. The report, in the New England Journal of Medicine, found moder-ate social drinking to be "strikingly rare" among reformed alcoholics, 1,289 of whom were interviewed live to seven years after treatment. The research disputes the assertion that people with alcohol problems can learn to drink socially. "This study suggests that there is little cause for opinism about the

likelihood of an evolution to longterm stable moderate drinking

among treated alcoholics," the re-

searchers wrote.

EXECUTIVES AVAILABLE

INTERNATIONAL EXECUTIVE

45, German nationality, fluent English, 25 years experience in North America and Far East, proven track record in marketing capital goods, experience in all areas of management and sales, is seeking a new position in the Far East, North America or Europe, (resume will be sent upon request).

Please reply to: International Herald Tribune. Box 2170, Friedrichstr. 15, D-6000 Frankfurt/Main.

A RARE FIND;

WORTHY OF INVESTMENT: IN DEMAND,

Pre-Holiday NYSE Trading Light

United Press International NEW YORK — Prices on the New York Stock Exchange headed lower Wednesday in light trading prior to the Fourth of July holiday.

The Dow Jones industrial average was off 5.72 to 1,328.28 an hour before the close. Declining stocks outnumbered advancing ones by a 5-4 ratio. Volume was about 78.2 million shares, down from 92.93 million in the same period Tuesday. period Tuesday.

Although prices in tables on these pages are from the 4 P.M. close in New York, for time reasons, this article is based on the market at 3 P.M.

"Most of the market is behaving quite sleepi-with very little enthusiasm of any kind," said ugene Peroui of Bateman Eichler, Hill Richards in Los Angeles.

"Most stocks are not very attractive right now," he said, and institutions are running after hot, special-situation issues rather than committing longer-term funds. Because of the holiday and of and uncer-

tainty about the outlook for the U.S. economy and corporate profits in the second quarter, "any advances will be selective and tempered by cautious profit-taking," he said. The market will probably continue its somewhat listless and directionless trend Friday, said Jack Sullivan, of Van Kasper & Co. in San

Federal National Mortgage Association was near the top of the actives and slightly lower.

MCA was also active, up sharply on rumors that RCA would make a bid. RCA was up a bit. American Hospital Supply was lower after reports that its proposed merger with Hospital Corp. of America may fail.

TWA was unchanged. Its pilots agreed to a 20-percent cut in salary if a New York financier, Carl C. Icahn, wins control of the carrier. In an attempt to thwart a bid from Texas Air, Mr. Icahn is also seeking concessions from TWA's two other major unions.

CBS, another takeover target, was higher af-ter announcing it would start a \$954.8-million offer to repurchase 21 percent of its common stock outstanding, offering \$150 a share in cash and notes. It also said it would sell \$300 million in assets and that its second-quarter net could fall as much as 25 percent.

Sperry (ex-dividend) was up a bit. The Organization of Petroleum Exporting Countries denied a report that most of the cartel's ministers agreed to a crude-oil price cut. Some oils were lower, with Chevron and Arco

Technologies were losing, with IBM, Burroughs and Honeywell off fractionally.

Squibb was up sharply after it said received approval from the Food and Drug Administration for expanded use of a hypertension drug. Other drugs were lower, with Merck, Abbott and Pfizer all slightly lower.

On the Amex, active issues included Dome Petroleum, Giant Food Inc. class A and Key Pharmaceuticals.

WALL STREET WATCH

Focus on Present Gives Perspective to Market

By EDWARD ROHRBACH

ARIS - Everybody looks toward the future on Wall ARIS — Everybody looks toward the runne on want Street, fearlessly forecasting how it will unfold. As for the past, well, that's history. Most people find it amusing to talk about how dumb folks were back then, rather than viewing the past as instructive about how now to invest. What few malyze is that most-clusive of moving targets, the present. But François Sicart, a Frenchman who has worked on Wall Street for 16 years and is vice chairman of Tucker Anthony Management Corp., handling more than \$200 million, dwells on the past as prologue and is fascinated by what is currently

transpiring.
"In New York, I'm kind of a hermit," he said. "I intentionally don't talk much to people on the Street. I try to derstand the present by not becoming too immersed in it. I think analysts and market strategists get confused that way, or they become overly

Sicart is buying technology issues for the first time in his career.

influenced by details and lose sight of the big picture." So what has Wall Street got its head in the sand about right

"It's this 'end-of-the-world' psychology," he said. "The con-sensus is that the U.S. economy is fundamentally sick, as illustrat-ed by the country's gaping trade and budget deficits. Thus, as investors, we are living on borrowed time and should keep our investment horizons very short. It would be unwise, therefore, to pay a premium for companies with higher intrinsic rates of growth because, when the collapse comes, they cannot escape it.

HIS has produced what Mr. Sicart called an "unsustainable anomoly" in today's stock market: "Practically all companies are selling in the same general price/earnings

But in reality, he emphasized, "All companies, of course, are not alike. Some have better balance sheets, for example, and certainly some have better long-term growth potential than

What has happened since the Dow average first approached 1,300 in late 1983, he continued, is that a wide disparity has developed between various categories of stocks, with many industrial and technology shares losing 30 or 40 percent of their 1983 values while others, traditionally regarded as "defensive" issues,

often have risen by a similar percentage.

He underscored this point by comparing Campbell Soup, a high-quality defensive stock, with IBM. He noted that the two were selling for exactly the same P/E ratio and, at a multiple of

12, which was also where the Dow 30s P/E rested. Yet other yardsticks, such as past growth and reinvestment rates, were widely divergent, he observed.

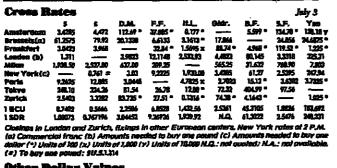

"In practically every respect, Campbell Soup's stock is today more expensive than IBM's in spite of the fact that the latter's

growth rate has been significantly higher," he said. "Moreover, there is every reason to believe IBM will continue to grow at a

It was a case — and the history of the stock market is replete with them, he pointed out — of investors "mistaking the epheneral for the structural."

Comparable with the current situation on Wall Street, he said, is if Bloomingdale's decided to sell every item in the store for the same price. By screening 1,512 "seasoned" companies on the New York Stock Exchange list, he found only 23 currently sporting P/Es higher than 23, which is a very tame multiple compared with past markets, let alone one at an all-time high. If past market patterns prevail, how does Mr. Sicart see the future? He thinks this "excess of a single-tier" market will continue for some time, fueled by the current mood of "skepti-

U.S. Sees Link As Policy Test

By James Tyson
The Associated Press

TOKYO - AT&T launched a joint communications venture in Japan on Wednesday, expecting to dramatically increase its sales share in a sector that the U.S. govern-ment sees as a key test of Japan's willingness to open its market wid-

er to foreigners. American Telephone & Tele-graph Co. joined 16 Japanese com-panies to start Japan Enhanced Network Services Corp., a system to permit communication among dissimilar kinds of computers. It will compete with other companies in the \$7-billion Japanese telecom-

nnications market. The new company will "dramati-cally increase AT&T's market share in Japan" and boost U.S. revenue in the sector, said John Cusick, an AT&T spokesman.
U.S. officials have said Japan's

policy toward its telecommunicamarket will symbolize its overall willingness to open up to greater foreign competition.

Last year, U.S. companies sold only \$126 million worth of telecommunications equipment in Ja-pan, while Japanese producers sold \$2 billion worth in the United

Overall last year, Japanese ex-ports to the U.S. market exceeded American sales here by \$36.8 bil-

The tie-up will help AT&T erase its own deficit with Japan," Mr. Cusick said, noting that the communications giant bought \$250 million worth of Japanese products last year while selling only \$80 mil-

lion worth to Japan.
U.S. trade officials have treed Japan to speed the entry of foreign companies into the telecommuni-cations market by relaxing strict standards and certification procedures and granting them a part in shaping the structure of the mar-

AT&T's new service enables computers of different makes to talk to one another. It could tie a company more efficiently to outside information and streamline the customer's complete operations, from manufacturing and the

watehouse to distributors. In addition to providing an information communication system modeled after AT&T's Net 1000 nication system service in the United States, the consortium will offer to process information, develop software, and sell or rent computers, communica-tions equipment and other related

AT&T plans to link Tokyo, Na-goya and Osaka with the enhanced network by October, launch a na-tionwide service by the end of 1986, connect the United States and Japan Net 1000 systems with an optical fiber running below the Pacific Ocean in 1988, and include a compatible system from Europe soon

AT&T holds a 50-percent share in Enhanced Network Services and by October plans to provide half of the company's \$40 million in capi-

Jobless Rate In W. Germany Eased in June

Compiled by Our Staff From Dispatches NUREMBERG — Unem-ployment in West Germany, unadjusted for seasonal factors, fall to 2.16 million in June from 2.19 in May, the federal Labor Office reported Wednesday. The figure is 8.7 percent of the work force, compared with 8.8 percent in May.

Seasonally adjusted unemployment was 2.33 million, un-

changed from a month earlier. Separately Wednesday, the Economics Ministry reported that incoming orders for the manufacturing industry, seasonally adjusted, rose a provisional inflation-adjusted 0.9 percent in May after rising a downward-revised 1.9 percent in April. The ministry had earlier estimated the April increase

at 2.8 percent. In June 1984, unadjusted un-employment fell to 2.11 unition, or 8.5 percent of the work force, from 2.13 million, or 8.6 per-cent in May. Seasonally adjusted unemployment in June 1984 rose to 2.30 million from 2.28 million a month earlier. The Economics Ministry said

the order index, base 1980 and expressed in volume terms, rose provisionally to 109 in May from 108 in April and 106 in March. The provisional May figure was 6.9 percent higher than a year earlier.

Foreign and domestic demand were both about i percent higher in May this year against April. (Reuters, AP)

Smokestack America Reconsiders

Tax Plan's Impact May Not Be Severe in Some Areas

By Gary Klott New York Times Service

NEW YORK - Across the industrial belt, from the auto plants in the Middle West to the steel mills in the Northeast, the threat posed by President Ronald Reagan's tax plan seemed clear: Smoke-stack America was to be the sacrificial lamb in the effort to cut taxes for individuals and foster development of faster-growing sectors of the U.S. econ-

omy.

But in the past few weeks, some prominent industry executives, Wall Street analysis and private economists have raised strong doubts that the

plan would be as crippling to the industrial heart-land as initially was thought.

Although the president's proposal would scale back billions of dollars in investment incentives, many depressed companies have accumulated enough tax losses to keep themselves immune from tax changes for years. And others would find the cutback in investment incentives at least partly offset by the lowering of the corporate tax rate. Furthermore, many smokestack companies are

expected to dry up because of the loss of tax "A thesis has been proposed that the president's

no longer as capital-intensive as they once were,

and orders to the smokestack industries are not

proposal would severely impact on heavy basic industry," Donald H. Trantlein, chairman of Beth-lehem Steel Corp., told the Senate Finance Com-mittee recently. "We believe this may be an over-

Mr. Trautlein is but one of several leaders in heavy industry who have joined forces with high-technology and service companies to support the president's plan.

The chairman of General Motors Corp. predicted that the plan would increase car sales. The chairman of Minnesota, Mining & Manufacturing Co. said it would promote more productive investments and help American companies compete with foreign manufacturers. And the head of Dominion Resources Inc., one of the largest U.S. electric utilities, estimated that the plan would allow his company to cut customer bills in Virginia by 5

Such endorsements have not, however, been accompanied by a shift in sentiment among most

members of the smokestack community.

"Exactly the opposite has happened," said John Meagher, vice president of LTV Corp. and chairman of Basic Industries Coalition, a group representing heavy-industry companies that also includes Inland Steel Co., Armoo Inc. and Chrysler

NEW YORK - The Finan-

cial Times of London published

its first American edition Tues-

day, sending news by satellite to

a plant in New Jersey where the

American and Canadian sub-

scribers used to receive an inter-

national edition delivered by jet

from Europe. But that system

was plagued by delays, accord-

ing to Laurence Allen, the pa-per's director for North America. Mr. Allen said the American

edition would be available early

paper was printed.

Trafalgar House Is to Take 29.9% Stake in John Brown

LONDON — Trafalgar House PLC, which owns Cunard shipping fine and has interests in construction, publishing, gas and oil, agreed on Wednesday to take a 29.9-percent stake in the troubled John Brown PLC engineering group.

The two companies said Trafalgar would put up £20.2 million (\$26.2 million) as part of an effort to refmance John Brown and to reduce the group's debts by about £70 million (\$91 million). John Brown is the best known for constructing Cunard's Queen Elizabeth 2 luxury liner and its predecessors, Queen Elizabeth and

Queen Mary. Since the 1960s John Brown has branched out into other areas, including the construction of turbines used on the pipeline that brings Soviet gas from Siberia to Western Europe,

The engineering group said Wednesday that in the year that ended in March, it made a pretax profit of £1.01 million (\$1.3 million), a turnaround from a loss of £5 million (\$6.5 million) in the previous

After taxes, however, the group recorded a net loss of £1.78 million (\$2.3 million) compared with a loss of £43.8 million (\$56.9 million) the

STC Sees First-Half Loss, **Cites Costs of Cutbacks**

LONDON - Reflecting the group's long-term prospects. problems in the British telecommunications industry, STC PLC, formerly Standard Telephones & Cables PLC, said Wednesday that it would show a loss in the first half of 1985 because of extraordinary

A company spokesman said the charges would cover efforts to reduce expenditures, including clo-sures and disposals. The group has already aunounced 2,300 job cuts this year.

"We're biting the bollet and taking all the charges in the first half," the spokesman said. Results for the period are not expected until Aug.

STC said it expected much lower operating profits in the first half than a year earlier but that the

board was confident about the For the first half of 1984, STC reported pretax profit of £52.2 mil-lion on sales of £517.3 million.

IIT Corp., which holds a 24-percent stake in STC, recently de-nied reports that it planned to sell its interest in the British company, but market speculation about a possible sale continued.

STC shares were quoted at 126 pence on Wednesday, down 12 pence from the level of late Tues-

Squibb Corp. said the U.S. Food and Drug Administration had giv-en it permission to market the drug capoten. Squibb said more than three million people worldwide have been treated with capoten for hypertension or congestive heart failure.

MEDICAL Phillips Sets Sale Of Assets Valued At \$140 Million CORPORATE HEALTHSCREEN

United Press International BARTLESVILLE, Oklahoma Phillips Petroleum Co. said Wednesday it has sold or contracted to sell \$140 million in assets to reduce debt resulting from its multibillion-dollar restructuring program that warded off two hos-

tile takeover attempts. The company said it also has received strong interest in additional properties valued at more than

\$800 million. Phillips plans to sell about \$2 billion in assets to reduce debts arising from its \$4.5-billion exchange offer following unsuccess ful takeover campaigns by T. Boone Pickens, the Texas oilman

financier.
Phillips said sales of about \$53 million have been completed, including its interests in the Union Island gas field in California.

around official prices by offering to accept payment over extended period, in most cases stretched from one to three months, or concluding countertrade agreements under which oil is bartered for other goods, are also expected to be criti-cized during the meetings. Nigeria and Iran, in particular, have been involved in barter arrangements.

Saudi Arabia's oil production has hit its lowest level in several decades recently by reaching 2.3 million barrels a day, while its OPEC mota amounts to 4.3 mil-

Sheikh Yamani, representing OPEC'S 8 ters its level of production to prevent the overall output from hitting the ceiling, has laiely underlined Sandi Arabia's inability to tolerate further production increases.

At a preparatory ministerial meeting held last month in Saudi Arabia, Sheikh Yamani echoed the threat that had been made in a letter by King Fahd to raise his country's production to 5 million barrels a day, according to OPEC officials who attended the meeting. The kingdom will "not remain handcuffed if overproduction contimnes," he said.

Ford to Make **New Engines** At U.K. Plant

International Herald Tribune LONDON - Ford Motor Co. will invest £157 million (\$204 million) to produce "lean-burn" engines at its plant at Dagenham, east of London, the company announced

Production of up to 200,000 third-generation "lean-burn" engines is to start in 1987, it said. "Lean-burn" engines burn a higher proportion of oxygen to fuel, cutting the amount of toxic emissions.

Dagenham was the only site among several under consideration in Europe where the new production facilities could be accommodated without an extension plant, a Ford spokes-man said. But Dagenham will lose the existing medium-size overhead-camshaft engines for Sierra and Granada models, which will be transferred to Cologne. Production of all European diesel engines will remain at Dagenham

ELF AQUITAINE IN 1984

Annual Stockholders' Meeting held may 30, 1985

Petroleum

In 1984, oversupply and reduced demand led to declining dollar prices. OPEC withstood sharp internal divisions which arose and which have continued, but was not able to counter moves to cut prices as in the past. Others, particularly North Sea producers, have become increasingly important on the international scene

With regard to exploration and production, 1984 was a very good year for ELF Aquitaine. Both production levels and quantities discovered were greater than in 1983. Also, the appreciation of the dollar, although raising exploration costs, clearly increased income from production.

Refinery and marketing operations posted losses unchanged from the high level of 1983.

The continuing slump in the overall consumption of petroleum products has shown a slight improvement in major countries. Consumption of heavy fuel oils, however, is down sharply in all countries. France is one of those most seriously affected and refinery operations face major problems adapting to the constantly falling demand.

The formula automatically determining the price of fuels and domestic fuel oil continued to be applied, but the French government intervened to limit its effects. The service station price war significantly worsened in 1984.

The strong recovery which began in the second quarter continued throughout most of 1984. This good overall economic situation was also a profitable one. In 1984, Atochem sales exceeded FF 19 billion, a 14% increase over 1983 on a comparable basis. Resources provided by operations totaled FF 750 million, whereas in

Restructuring of ELF Aquitaine's chemical operations was begun in October 1983 and continued through 1984. In November 1984, the Group announced the formation of two operational management structures: Atochem for fine and specialty chemicals (excluding biochemicals) and Sanofi for biochemicals.

ELF Aquitaine Petroleum extended undersea mining operations and Texasgult's sales of phosphate treated

products increased 19% compared with 1983. Consolidated highlights

- Sales: FF 177 billion compared with FF 134 billion in 1983.

This 32% increase is due mainly to the consolidation of Atochem sales over one complete year. - Resources provided by operations (after deducting costs of unproductive exploration): FF 21.7 billion

compared with FF 16.6 billion in 1983. Investments: FF 14.7 billion, unchanged from 1983.

- Net income (attributable to stockholders of SNEA): FF 6.5 billion compared with FF 3.7 billion in 1983.

 Net income per share (taking account of new shares issued with rights at the beginning of the year): FF 65 compared with FF 41 in 1983.

Parent company highlights

- Net income: FF 2,437 million, compared with FF 2,270 million in 1983

 Net dividend per FF 10 per value share paid on new and existing shares: FF 13.50 (plus tax credit of FF 6.75). compared with FF 12 (plus tax credit of FF 6) in 1983. Payment is to be made on or after June 28, 1985.

The Annual Stockholders' Meeting appointed Louis Astre as Director for the remaining term of office of Mr. Pronteau, recently deceased.

Extraordinary Meeting of Stockholders

An Extraordinary Meeting of Stockholders, held following the Annual Stockholder's Meeting, authorized the Board of Directors to grant options on the purchase of ELF Aquitaine shares to personnel in the Parent Company and Group.

Growing with the need to manage our water resources

Products from several Ametek Divisions are used to manage the capacity of deep wells, help farmers reduce irrigation needs and provide clearer. better tasting drinking water. Write for latest reports to

Dept. H, 410 Park Avenue, 21st Floor, New York. NY 10022.

How to get More Gold for Your Money.

Krugerrand gold bullion coins combine the age-old security of gold with instant liquidity. Because they are legal tender they are traded 24 hours around the globe at an advantageously low premium. Gold gives you the security.
The Krugerrand gives you now
more gold for your money.
Ask your bank or broker.

Or write for a free copy of the European Gold Guide to:

A Higher one

His most recent purchases inchide Esterline, Kulicke & Soffa and Perkin-Elmer. His biggest single holding is Norton Co. and another favorite is Baldor Electric. Edward M. Kerschner, chairman of Paine Webber's investment po-

hey committee, also favors technology stocks from the same perspec-tive of comparative valuation. "It's the best sector in the market today," he said. "The last time technology stocks were this cheap was 1978 when IBM was at \$59 a

ago when Paine Webber's valua-tion model showed the group to be the "most valuerable" on Wall

Mr. Kerschner said the trick for investors was to distinguish between simple computer stocks that were still vulnerable and companies which recognize that their business is technology.

"The classic story is told of two رل ا "The classic story is told of two buggy whip manufacturers at the mra of the century, the ABC Buggy Whip Co. and XYZ Transportation Implements Inc.," he said. "As the automobile replaced the horse and carriage, ABC went out of business, XYZ understood that its business. XYZ understood that its business. ness was transportation and realized the potential opportunity by fastening the ends of its buggy whips together and supplying fan belts to the automakers

Mr. Kerschner maintained that technology's long range prospects were as bright as ever, but that the future lay with companies that of-fered "office solutions rather than just office products." His picks were IBM, Callinet, Digital Equipment, Motorola and Prime Com-

Shearson Lehman/American Express this week produced its annual mid-year stock selections: Associated Dry Goods, Chi-Chi's, and mining, would not feel any Daisy Systems, Eaton Corp., Equitable Resources, Golden West Fisome time. Because of the demancial, Frank B. Hall, IBM, Up-

research, said the recommenda-tions reflected three basic themes-:"First, that consumer buying will continue to be strong; technology stocks will stocks have to come back; and that interest rates will remain modest."

U.S. Industry Reconsiders Tax Plan

Corp. "There is an increasing amount of concern about the proposal. A lot of people have called me in the past two weeks that didn't call the first two weeks after the proposal came out."

To lower the corporate tax rate

to 33 percent, from 46 percent, the plan would eliminate the investment tax credit, which is worth 6 to 10 percent of the cost of equipment to slash spending on plant and purchased, and stretch out the period over which companies must write off the cost of plant and equipment, which means smaller depreciation deductions each year. In addition, those who claimed big depreciation write-offs in the past five years would be forced to pay a benefits are nearly as good as under

special windfall recapture tax. Nevertheless, the impact of the plan will vary considerably from industry to industry, and even from

company to company.

Some segments of smokestack industries are no longer as capital-intensive as they once were. Nowhere is this so apparent as in the electric utility industry, traditionally one of the most capital-intensive.

Cutbacks in investment incentives would come just as most utilities in the smokestack regions are finishing up their last major invest-ment projects for some time, said Barry M. Abramson, an analyst at Prudential-Bache Securities.

Thus, like Dominion Resources, the parent of Virginia Electric & Power Co., many utilities would not greatly miss the investment incentives, but would benefit significantly from the lowering of the corporate tax rate. And since utili-ties tend to pay high dividends, they would also benefit from a proposed 10-percent deduction for

dividends paid to shareholders.

The chemical industry is also no longer as capital-intensive as it once was. As John Henry, an analyst at E.F. Hutton & Co., pointed out, many of these companies have diversified into areas, such as spe-cialty chemicals, that involve less

capital spending.

Moreover, many of the compa nies that remain heavily capitalpressed conditions these industries ohn and Wal-Mart. have faced in recent years, they Eliot Fried, the firm's director of already have more deductions than they can use. They have accumulated enough tax losses from years past to insure that they pay no

laxes for years. Such is the case with Bethlehem Steel. The fact that investment incentives are of little help to compa-

Lennox, a vice president at Salo-orders from either. mon Brothers Inc.

Nonetheless, an overriding con-cern of all smokestack companies is whether the cut in investment incentives will cause their customers

Mr. Translein and others believe

the current system, and in some

spread over a longer period, a com-pany could wind up claiming more deductions than it does now. The deductions than it does now. The reason is that the new system would be indexed for inflation. This inflation bonus was a major factor in the Congressional Budget Office's finding last week that the tax plan would cost the government a significant amount of revenue in the next 15 years.

ment a significant amount of revenue in the next 15 years.

As for the repeal of the investment tax credit, Mr. Translein argued that "the trade-off between the loss of the investment tax credit and the rate reduction may not have the serious impact on the heavy industrial sector which is commonly assumed."

There are other indications that businesses would not slash capital spending plans as much as some have feared. David G. Sutiif, a cap-ital-goods analyst at Salomon Brothers, said he surveyed about

two dozen capital-goods producers.
"They didn't think customers were going to change plans at all," he said. The reason: Most orders

Indirectly, however, the repeat of the investment tax credit would hart some of these

As for the machine-tool industry, Eli S. Lustgarten, an analyst at

Nevertheless, the decline in cash flow from reduced investment incentives, Mr. Sutlif said, is bound to have some dampening effect.
"The tax plan has a negative bias to
it anyway you slice it," he said.

If the auto industry, for example, examination of the depreciation cover their capital expenditures, proposal, many executives have been surprised to find that the benefits are nearly as and features. enters a cyclical downturn, earn-

American Airlines Plans eases even better. Even though the depreciation deductions would have to be Flight Hub at Raleigh

Washington Post Service WASHINGTON — American Airlines will open a \$60-million bub at Raleigh-Durham Airport in North Carolina in a major expansion of its north-south route, the

company announced Tuesday.

American plans 40 to 45 flights a day at Raleigh-Durham serving 20 to 25 cities, most of them along the Eastern Seaboard. The airline would be competing directly in markets primarily served by Eastern, Picomout and Delta airlines.

Output, Sales Records Announced by Jaguar

LONDON — Jaguar Cars set new production and sales records in the first half of 1985, the compa-

ny said Wednesday.

Production at its three English plants rose to 20,195 units, 17 percent more than January to June last year, it said. Sales in Jaguar's two have been for goods that were needed either as a cost-saving device, to make a new product, or for a restructuring of operations. He Britain, it said.

SWEETNESS AND POWER: The Place of Sugar in Modern History.

By Sidney W. Mintz. 274 pages. Illustrated. \$20.

Viking Penguin Inc., 40 W. 23d Street, New York, N. Y. 10010.

Reviewed by John Gross

B ECAUSE the associations of sugar are predominantly pleasurable, it is hard to grasp how significant a part it has played in the history of the past 300 or 400 years. Unlike iron, say, or gold or cotton or wheat, it somehow does not seem quite serious enough for a starring role. Yet it has sustained empires; its social influence and economic impact have been immense; and it has also been, as Sidney W. Mintz says, "one of the massive demo-graphic forces in world history," responsible for the uprooting, resettling and as often as not the enslaving of millions of people employed in its cultivation

Mints, a professor of anthropology at Johns Hopkins University, has spent most of his professional life studying rural communities in the Caribbean. Here at least is a part of the world where no one could doubt the importance of sugar; it has shaped the region's history, and it remains the most important crop.

ry, and it remains the most important crop.
Yet, for a time, even as thoughtful an observer as Mintz, while he immersed himself in the life of the growers, tended to take for granted the other half of the equation. The Caribbean supplied the sugar — but where did the demand come from, and why had it increased so rapidly? Since the answers did not seem to him self-evident, he gradually felt impelled to study the European end of the story. Now he has written a book in which he traces the history of written a book in which he traces the history of production and consumption alike, and specu-lates on the ways in which they interlock.

lates on the ways in which they interlock.

Cane sugar was originally domesticated in New Guinea and originally processed in India. Few Europeans knew of its existence until about A. D. 1000, but during the Middle Ages it became a well-established inxury. A mass market began to develop in the mid-17th century; by 1800 about 250,000 tons of sugar were reaching consumers through the world market. reaching consumers through the world market; 90 years later the figure (which now included beet sugar) had shot up to more than six neet sugar) had snot up to more than six million tons. According to Mintz, "world sugar production shows the most remarkable upward production curve of any major food on the world market over several centuries, and it is continuing upward still."

The first European-controlled sugar plantations more swized from the Araba during the

tions were seized from the Arabs during the Crusades. Eventually the eastern Mediterranean was succeeded as the main area of pro-

the link between sugar cultivation and slavery
which was to last until the 19th century became
firmly forged in Crete, Cyprus and Morocco," Mintz quotes the geographer J. H. Galloway as saying - but what particularly interests Mintz about the plantations that developed in the Caribbean is that he believes they can best be thought of as "agro-industrial" enterprises, the closest thing to industry that the 17th century has to show. They were also, he argues, if not "capitalistic" themselves, at least "an impor-

tant step toward capitalism." However we define them, there can be no \$ doubt that they produced sugar in unprecedented abundance. And what was the market they aimed at? In turning to the consumers, Mintz confines himself to the British experience, which partly involves him in strictly local considerations. In most respects, however, Britain can serve as a representative case; as the first industrial nation, it opened paths that others have followed.

Mintz distinguishes five main uses to which sugar has been put, of which two are now unfamiliar and one of only marginal signifi-cance. In medieval times it was regarded as a spice; until the 19th century it was prescribed as a medicine. It was also widely used, by those who could afford it, as a form of decoration, and Mintz gives a fascinating account of the sugar and marzipan sculptures, known as ibileties," that were a feature of royal barquets from the 13th century and taken up by the nobility and wealthy commoners. As the consumption of sugar increased, it

lost much of the symbolic value that such extravagances had implied. Instead, it came to be used primarily as a sweetener — above all in conjunction with those other exotic imports, coffee, chocolate and rea - and as a preservative. By the end of the 18th century it had been transformed from a luxury into a necessity; by the end of the 19th century it was supplying almost a sixth of the calories in the average British diet, and a higher proportion still in the case of the poor.

"The first sweetened cup of hot tea to be drunk by an English worker was a significant historical event," writes Mintz — but it was an event that he regards with mixed feelings. It prefigured a diet that was not only unhealthy, but also, he argues, made it cheaper to main-tain the new industrial proletariat, with sugar functioning as a kind of drug. At one point he

refers to it as an "opiate."

Mintz's general conclusions are controversial, and no doubt they will provoke disagreement from other historians. But they are too solidly based to be set aside, and you do not have to accept them in toto to find "Sweetness and Power" an important and stimulating

This Man Is Blind to **Nothing**

By Dave Anderson

NEW YORK - When he was 8 years old, Craig MacFarlane earned a gold medal for winning a wrestling tournament. That evening at his home in Sault Ste. Marie, Ontario, he hung the ribboned medal on a bedpost in his room. And when he woke up every morning for several weeks, he reached over and caressed the medal. "I knew then," he recalled, "that

wrestling was my vehicle out."
Out of the darkness. Six years earlier, at age 2½, MacFarlane had been playing with welding equipment. Somehow the sparker that lights a welding torch accidentally seared his left eye, blinding it instantly. Within three weeks, "sympathetic" ophthal-ma, a severe inflammation of the eyeball, had blinded his other eye.

"I remember hurrying into the house after the accident," he said, "and running into a door that was partly open. I never saw the door. Not long before his accident, MacFarlane had been out in the Ontario woods with his father, Ed, a contractor whose hobby was trapping animals.

"I don't remember my parents' faces or my older brother lan's face," he said. "The only thing I have a memory of seeing as a little kid was a porcupine that day in the woods with my father — a big porcupine with all those quills sticking out. That porcupine is the only thing I remember seeing. People think that because I'm blind, I see black. But why would I see black? I don't know what black is?

Husky at 5 feet 7 inches (1.7 meters) and 155 pounds (70 kilograms), his voice bursting with energy and enthusiasm, MacFarlane does not even seem to know what being blind is. In a white golf shirt and blue jeans, he resembled young athletes everywhere. And he is probably the world's most accomplished blind athlete, certainly the most versatile: a wrestler, a runner, a discus thrower, a swimmer, a downhill skier, a water skier, a golfer.
"But now," he said, "I'm in the transition from

being an athlete to being a business At age 23, MacFarlane, who has dual citizenship because his mother, Joyce, is an American, was recently named a consultant to the President's

Craig MacFarlane is certainly the world's most versatile blind athlete: wrestler, runner, discus thrower, swimmer, downhill skier, water skier, golfer.

Council on Physical Fitness and Sports. He directs program development for the Living Well Founda-tion of Houston. He plays 11 musical instruments, he composes songs, sings and plans to record an album. He is collaborating on his autobiography. "I'd like to see a motion picture of my life," he

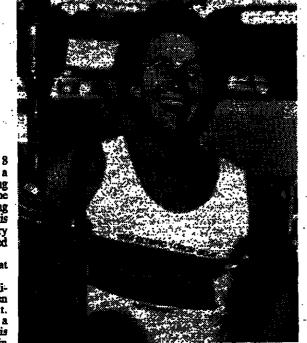

Before leaving Carlton University in Canada after two years, MacFarlane had a B average in pre-law and political science.

One of MacFarlane's regrets is that his blindness prevented him from playing hockey.

"If I wasn't blind," he said, "I'd probably be a

athletic and musical talents, he is an inspirational speaker who addressed the 1984 Republican National Convention, one of his 231 speeches in 39 states last year. His next ambition is to be a host on a weekly half-hour network radio show. "I want to call it, 'Craig MacFarlane on the

Road," "he said. "My target is the youth of Ameri-

Craig MacFarlane running in the torch relay across the United States before last summer's Olympics.

582-44 record over 11 years, mostly against sighted opponents. He would have been a candidate for the Canadian Olympic wrestling team in 1980, but that team was never selected. Canada had agreed with the U.S.-inspired boycott of that year's Summer Olympics in Moscow.

As a youngster at wrestling matches, MacFarlane often would hear himself described by opponents as "that blind kid." Seldom by his name. "I used to tell myself, Tve got a name and you're

going to know it before the day's over." His opponents and observers in every sport have learned his name. Although wrestling is the only sport in which he has competed against sighted opponents, MacFarlane has adjusted to other sports quicker than most sighted people. In early August he will be in Oslo for the world blind water-sking championships less than a year after trying the sport for the first time at Cypress Gardens,

"Just skiing along, that was boring," he said. "I asked them if I could water-ski jump. They asked me when I wanted to do it, and I told them right

Taken out to the ski-jump ramp in a boat MacFarlane walked around on it to get the feel of its dimensions as well as the upward slope of the 21-foot ramp that projects a jumper as much as 50

"I fell the first time, the rope popped out of my hands," he recalled "But I didn't have any more trouble. I landed on 93 of my first 100 jumps." Upon nearing the ramp, MacFarlane water-skied alongside a companion who alerted him to his approach with a numerical countdown.

"He'd yell '5 ... 4 ... 3 ... 2 ... 1'," he said, "and off I'd go. Snowskiing was a little different. The guide skier skied behind me, telling me which way to turn, but I asked him to ski ahead of me so I could hear where he went. By the end of my first day at Smuggler's Notch, Vermont, I was coming down from the top of the intermediate mountain."

When he began playing golf last year, MacFarlane applied the same philosophy.

"I always say, "It can 'see' it, I can do it that's the title of my book," he said. "And in golf, especially putting. I see the green by walking on it. I feel the terrain, whether it's uphill or downhill, I

said. "And I'd like to portray myself in it. It's all part of my drive to be an equal."

Before leaving Carlton University in Canada

the bottom of the cup coming out of my brain. My third month, I broke 100."

One of MacFarlane's regrets is that his blindness

"If you store it in your memory bank, you don't need to study much," he said. "But halfway through college, I got bored and left."

hockey player. Going to school in Brantford, Ontario, I lived next door to Wayne Gretzky, we got to be good friends, Weiner and me — that's his He is not bored now. In addition to all his athletic and musical talents, he is an inspirational speaker who addressed the 1984 Republican Name that Gordie Howe was better. Then one day stayed there 14 months. That's when I ran on the Olympic torch relay."

And for blind people, MacFarlane is a torch in the darkness now.

The youth of America might be embarrassed by what MacFarlane has done. As a wrestler, he had a can you expect other people to believe in you?" "If you don't believe in yourself," he said, "how

Curren Overpowers a Listless McEnroe

Becker Beats Leconte. Other Seeds Triumph

By Andrew Warshaw

WIMBLEDON, England - Defending champion and top-seeded John McEnroe was eliminated from the Wimbledon tennis championships Wednesday, beaten by 6-2, 6-2, 6-4 in the quarterfinals by Kevin Curren, the No. 8 seed.

With McEnroe's defeat, which followed Monday's elimination of second-seeded Ivan Lendl, No. 3 ranked Jimmy Connors became the highest remaining seed in the men's semifinals by beating Ricardo Acana, a qualifier from Chile, 6-1, 7-6

(7-3), 6-2.
Defending women's champion.
Martina Navratilova was faced with her toughest set of the tourna-ment so far before beating Pam Shriver 7-6 (7-5), 6-3 to reach the semifinals.
Chris Evert Lloyd, co-top seed

with Navratilova, continued her march toward the Grand Slam by trouncing Barbara Potter, 6-2, 6-1. Connors and Curren will meet in one men's semifinal while Anders

Jarryd of Sweden, the No. 5 seed, will face unseeded Boris Becker, 17, of West Germany in the other.

Jarryd beat Heinz Gunthardt of
Switzerland, 6-4, 6-3, 6-2. Becker, the rising young star of European tennis, served 12 aces en route to a 7-6 (9-7), 3-6, 6-3, 6-4 victory over

Henri Leconte of France. Two other U.S. women, Zina Garrison and Kathy Rinaldi, reached their semifinals. Garrison, the No. 8 seed, rallied to beat quali fier Molly Van Nostrand, 2-6, 6-3, 6-0, while Rinaldi scored a 6-1, 1-6, 6-1 victory over Helena Sukova of

Curren, whose power serve sharp returns and lightning passing shots contrasted with a strangely listless McEnroe, won in 1 hour 49 minutes to reach the semifinals for the second time.

Czechoslovakia.

McEnroe, 26, who was aiming to become the first American to win looked relaxed and confident, prothe Wimbledon men's singles duced several spectacular winners crown three straight times, could to end the challenge of Acana, not handle the pace of Curren's ranked 133d in the world.

game and appeared mentally and physically slow. The New Yorker opening set that took just 19 minwon the title in 1981, 1983, and 1984 and had not lost a singles match here since Connors beat him in the 1982 final.

"It was obvious he was hitting the ball harder than me. He just overpowered me," said McEnroe. "I played a sub-par match and I was surprised how badly I was serving. When you lose, everything seems to hart a whole lot more."

Asked if there was any time in the match when he thought he might still win, McEnroe replied jokingly: "Only if he broke an ankle or something. He completely outplayed me."

After the first four games had gone with serve, Curren ripped off five straight to win the opening set and gain a quick break in the sec-

The match burst into controversy midway through that set when McEnroe questioned a service by Curren. As umpire David Howie declined to overrule his service judge and asked McEnroe to play on, someone in the crowd shouted 'Don't worry, John." That upset Curren, and the con-

fusion continued when McEnroe was given a warning for unsportsmanlike conduct, for pursning the original line-call argument and muttering sarcastically.

Kevin Curren lunges for a shot during 6-2, 6-2, 6-4 upset of top-seeded John McEnroe during Wimbledon quarterfinals.

Then McEnroe called for tour- dered three set points before Acuna was never behind after breaking reach the final since Wilhelm Bun nament referee Alan Mills and ning service returns gave him an-other break for a 5-2 lead.

matched her opponent stroke for singles at Wimbledon, could be-

After he and Leconte had exchanged breaks early in the open-ing set, each held serve to 6-6 and moved into the tie breaker. Leconte had a set point when he led, 6-5, but Becker unleashed a big serve to save the set and three points later broke Leconte with a stunning backhand down the line, then clinched the tie breaker.

Leconte, who upset Lendl in the fourth round, railied to level the match, breaking his opponent in the seventh game of the second set. But he rarely threatened Becker's serve in the last two sets.

"When he serves, it's difficult to see the ball," said Leconte. "You can't tell whether it's his first or

Cards Speed by Expos on Tudor's 3-Hitter after six innings; the last two games led off the bottom of the 10th with against the A's he has 6 hits in 8 at his sixth homer of the year — and

MONTREAL - The St. Louis themselves by terrorizing oppo-nents on the basepaths. Not to be outdone by his speedy teammates, pitcher John Tudor is winning games at a rapid pace.

Tudor, at one point 1-7, pitched a three-hitter Tuesday night as the Cardinals beat the Montreal Expos, 4-0. The triumph was the lefthander's seventh straight.

"I'm on a good streak now," Tu-dor said, "I had a tough April and May, but I'm back on the track and finding the groove. That's the best ball game I've pitched this season and it was even a bigger game because we finally won a game in Montreal. The Expos have been beating up on us this season."

For Tudor, who Tuesday was named the NL Pitcher of the Month for June, it was his fourth complete game and third shutout this season. He allowed three singles and did not permit a runner to

reach third base. Backing Tudor was Jack Clark - who went 3-for-3, scored a run

and drove in a run — and the Cardinals' usual speed. They stole four bases but, more importantly, rattled the Expos' starter, David Palmer.

Vince Coleman led off the first inning with a single and Palmer proceeded to make 13 throws to first base trying to keep the major leagues' leading thief honest. Cole-man still stole his 54th base, Palmer followed with a wild pickoff throw into center field and the Cardinals were off to a three-run inning.

Coleman scored on a bunt single by Willie McGee, who got four hits and stole two bases. Tommy Herr walked and although McGee was caught stealing third, Clark's double scored Herr and Terry Pendleton's single scored Clark.

first base and lost his concentration," said Montreal's manager, Buck Rodgers. "But there is no other reason for losing the game other than John Tudor, and I've never seen a faster team in baseball than the Cardinals."

knuckleballer Joe Niekro, despite three passed balls that scored a run. recorded his 200th victory in the majors when Houston pinch hitter Phil Garner doubled in the winning run in the eighth. Niekro, 40, and his brother, Phil

46, who pitches for the New York Yankees and has won 291, need 38 more victories to pass Gaylord (314) and Jim Perry (215) as baseball's winningest brothers.

My July 4 Is Your July 4

the syndicated talk show host who owns the morning radio audience in Southern California Michael was taping a program that had to do with the Fourth of July and wanted to discuss it.

I was surprised when Michael informed me that Californians cel-

ebrate our July 4 with the same fervor as the 13 original states

Why would that be?" I asked him "California had nothing to do with founding of the

Michael re- Buchwald olied: "As long as I can remember. Californians have always supported life, liberty and the pursuit of happiness, and Independence Day does have a special meaning for us. We even have a greeting in Spanish out here, My Fourth of July is your Fourth of July.

That's fine now. But where was California when our founding fathers needed you?" I asked. Michael was slightly nonplussed.

"We may not have fought in the revolution," he said, "but Californians have paid their dues. We gave the country two presidents of the United States."

"And we gave you one back. Don't get me wrong. You people have a right to celebrate any Amer-ican holiday you want to. But those of us who fomented revolution and put our lives on the line to overthrow that rotter George III are suspicious of states who came into the Union after the hostilities

Chagall Painting Stolen From New York Gallery

The Associated Press
NEW YORK — Thieves who avoided an alarm system at an art gallery escaped with a \$250,000 painting by Marc Chagall.

The break-in at the Félix Vercel Galerie was discovered Tuesday. Also missing were two brass figures worth a total of \$16,500.

Washington — I received "California was not in a position in 1775 to fight the British," Michael said.

"I've heard the same story from Oregon and Montana. Everybody west of Pennsylvania sat it out until they saw which way the wind was

I could tell Michael wasn't quite sure he wanted to continue the conversation. "What did you expect us to do?" he asked.

"Did it ever occur to you to say thank you? Do you realize that if it hadn't been for our forefathers. California would be no better off today than it was 200 years ago? While you people out there were getting tan, lifting weights and trading real estate, Tommy Jefferson, Johnny Adams and Ben Franklin were sweating it out in Philadelphia trying to write a paper that would guarantee your rights as

"There were 37 states that were not involved in the revolution," Michael said. "Why pick on us?" "Because Californians are always telling people along the East Coast what fools we are for living here. They keep bragging about their lifestyle. What they forget is that, if George Washington hadn't crossed the Delaware, there wouldn't be a California lifestyle."
"Is there anything that we can do

now to make up to you for missing the Revolutionary War?" Michael

"One thing you might do is tell your President Reagan to stop at-tacking the 13 original states because they want to deduct their local income taxes from their federal returns. He goes out West ridiculing the government spending habits of the people back East and gets everyone mad at New York and New Jersey. We fought a lot of bloody battles against the Redcoats so Ronald Reagan could sleep in the White House."

"Why don't you tell Reagan

yourself?" Because he doesn't listen to us. He considers people who live in Washington part of the problem." "Having said all that, may we Californians celebrate your Fourth

"I imagine so, if you don't make too much noise."

Tate: Conductor of Exemplary Career

By Joseph McLellan Washington Post Service
WASHINGTON — "I curse occasionally, but it doesn't really do any good," said Jeffrey Tate. The 42-year-old conductor has more to curse about than most of

us, but also more reason to be

thankful. Tate, who conducted the Metropolitan Opera in two recent Washington performances of "Lohengrin" and one of "Cosl fan Tutte," is one of the hottest opera conductors on the international scene. Besides being busy at the Met, he is principal conductor of the Geneva Opera and is about to take the position of principal conductor at the Royal

his native England. He is also severely handicapped, with two spinal malfor-mations (spina bilida and kyphoscoliosis) that have twisted his 6-foot-6 (2-meter) body down to a height of 5 feet 8. His left leg is paralyzed and shorter than his

Opera House, Covent Garden, in

Tate, who cannot work standing up, conducts from a chair.

Still, his arms and hands — a conductor's essential tools — are in fine condition. So is his state of

"My problem is not as serious as Itzhak Perlman's," he said (the violinist was crippled by polio as a child), "and I'm not so militant about the rights and problems of the handicapped, though I am willing to do whatever I can to help. I try to ignore my disability as much as possible; otherwise, you end up being very angry and wasting energy.

So far, he says, his experience has made him think that "obstacles can ultimately give you ad-

Ignoring his disability and turning obstacles into advan-tages, Tate followed two careers simultaneously until 1970. In that year, having earned his degree in medicine at Cambridge Universi-ty and finished his internship in a London hospital, he was ready to go into practice; but he decided instead to devote his life to his

other love, opera.
"Technically speaking," he said, "I could still go into medicine, but I would have to take a refresher course. A lot has changed since 1970."

cal biography. He showed a special love and talent for music at an early age, but his parents, who encouraged him to overcome his handicap, also worried that their son might become a starving artist. They insisted that he learn a

He was a dutiful son, following his prescribed path, but continued to be active as an amateur musician throughout his years of study. The hospital where he in-terned had a staff orchestra and chorus, and he became the conductor. Earlier, at school, he played the piano for student operatic productions - for example, an "Amahl and the Night Visitors" for which its composer, Gian Carlo Menotti, was in atten-

He was also a singer, in the internationally respected choir of King's College, Cambridge, and in some student productions.
"I was one of the pickled boys

in one of the first productions of Britten's 'St. Nicholas,' " he recalled. "That's when I met Benja-

even though it was only a school production. I think it was then that I realized that music was a way of life. I don't call it a career; way of the ruot team is a career, if you think of it as a career, you're finished." (The "pickled boys" are the subjects of one of the miracles attributed to St. Nicholas and celebrated by Britten in his cantata.)

"My family was not particular-ly musical," Tate said, "and my father, who was a postal worker - decidedly lower middle class - made me stop taking piano lessons because he thought they would interfere with my academ-ic work. But I went on playing even after the lessons stopped." He began to study opera at the

London Opera Centre during his 18-month internship, and when a vacancy opened for a rehearsal pianist at Covent Garden he applied for and got the job — a full-time post in one of the world's leading opera companies within leading opera companies within a year of leaving medicine. But his

nearly a year and a half after he had made his debut at the Met. "I did not originally think of becoming a conductor at all," Tate said. "With my experience as a singer and a pianist, I thought I could be useful as a vocal coach and might eventually get into administration. That was

my original objective at the Met. "But almost purely by chance, I happened to be invited to conduct 'Carmen' at Cologne, and it went very well, so I was invited back to conduct The Magic Flute' the next year, and then before I knew it I was conducting

Then, he recalled, at the Met, while he was playing the piano for rehearsals, the opera company's conductor, James Levine, told him, "You've got to con-

"Finally, I was scheduled to conduct 'Cosi." Then it was can-celed because of the strike, so I found myself instead making my Metropolitan Opera debut con-ducting 'Lulu' without ever hav-ing had a chance to conduct a rehearsal. Of course, I had coached it and helped Pierre Boulez to prepare his premiere per-formance of the complete score - but was that enough? Georg Solti said I was crazy, and I thought he was right. Jimmy [Levine] kept saying, 'Of course you can do it,' and he turned out to be

That was December 1980. Since then Tate's conducting career has been moving quickly and steadily upward. As chief con-ductor at Covent Garden, he will share responsibility for the opera bouse's musical life with its music director, Bernard Haitink. He is also becoming the principal con-ductor of the English Chamber Orchestra and has just signed a four-year recording contract with HMV that will include a com-plete cycle of the Mozart sym-

"It will be nice to have my life centered in England again," Tate said. "I have been there, of course, but I haven't lived there since 1977 and I'm homesick. I've been a New Yorker since 1978, and I have acquired the Manhatwork was all backstage; he did not conduct at Covent Garden, where he is now to become princi-pal conductor, until April 1982.

Denver Seeks Open Door

year and a half the pop singer has been trying to arrange to do a Chi-Association. Another competitor nese concert in September that was the star of TV's "Leave It to would be telecast live worldwide. The main hurdle seems to be where he would sing. "John Denver live from the Great Wall has a nice ring to it, but where are you going to put the andience? Denver said soon after arriving in China for another round of negotiations after a Soviet concert tour. He said a riot in May after a soccer game in Beijing ap-peared to have the Chinese authorities "scared to death" about crowd control. "My fans are not the kind of people who riot or are antagonis-Roads," are very popular in China.

Jack Lang, the French culture minister, has made three Ameri-cans officers of arts and letters: the producer Irwin Winkler and the azzmen Herbie Hancock and Dexter Gordon, stars of Winkler's new production "Around Midnight." The ceremony took place Tuesday night at the studio near Paris where the Franco-American production. directed by Bernard Tavernier, is being shot.

The sydicated advice columnist Ahigail Van Buren, acting on a reader's inquiry, recently told fol-lowers of "Dear Abby" that spruce gum, a rare concocion that Abby suggested as a substitute for chewing tobacco, was available at the celebrated L. L. Bean store in Free-port, Maine. At least, that's what one misinformed Bean's employee told the columnist. Now Bean's has been deluged with orders for a product that the store hasn't car-ried for about a year. "Spruce gum is scarcer than hen's teeth," D. Kilton Andrew Jr., the company's public affairs manager, said in a letter to Abby. "Please let your readers

China has offered John Denver the Great Wall, but he is holding out for the Forbidden City. For a touch," said Rogers, who is a spokesman for the National Rifle Beaver," Jerry Mathers.

In his first address to a large group in more than four years, the Indian guru Bhagwan Shree Rajneesh told 10,000 of his followers in Rajneeshpuram, Oregon, that "only the retarded and utterly mediocre people can believe in God" and that "no sane person can believe in God, only in sin." The occasion was the Rajneesh sect's fourth annual World Festival. For tic," he noted, Denver's tunes, es- a spiritual leader, the guru was hard pecially "Take Me Home, Country on religion; his speech criticized all Roads," are very popular in China the major faiths.

Two native Philadelphians, the comedians Bill Cosby and David Brenner, donated their time to headline a concert for the 270 people left homeless by the fire that on the radical group MOVE. "I'm here because I love the city," Cosby said before the concert. "It's sort of like a family." As a child, Brenner said, he lived several blocks from the neighborhood involved.

The actor David Soul has sued the city of Pittsburgh, its mayor and chief of police, several other city officials, two steel corporation executives, a Presbyterian church and a Lutheran bishop for \$50 million, contending that they violated his right to free speech because he was arrested outside the church on

Easter while reading a Bible pas-sage in a demonstration on behalf of unemployed steelworkers. Jacqueline Kimberly, 34, a figure in Roxanne and Peter Pulitzer's child-custody court battle, has filed

for divorce from James Kimberly, know that we are trying to get someone interested in spruce gam production because our supplier has retired."

No one was surprised: The king of the cowboys, Roy Rogers, 72, won the Celebrity Cup at a trap shoot in Chino, California, with a 25-year-old rifle he bought from for divorce from James Kimberly, 78, of the Kimberly-Clark Corp. 78, of the Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Kimberly-Ki
